

DATA INSIGHT

Turn data into information, and information into insight

Framesoft Data Insight (FDI) lets you discover hidden insights from your data and transform huge amounts of raw data into actionable reports and dashboards. Track your key business metrics, see longtime trends, identify outliers, and unearth hidden insights by using FDI as add-on to any Framesoft solution.

Analytics are changing the way enterprises do business. Every organisation is collecting and creating huge amounts of data. As companies have accumulated more and more data the need to analyze & extract additional value from that data effectively has increased dramatically. Understanding that data, interrogating data to tell relevant & meaningful stories and making those insights available for everyone is how modern businesses scale at pace. Framesoft Data Insight (FDI) is Framesoft's answer to this demand.

FDI lets our clients use their internal data in real-time to analyze their operations and make better decisions and predictions. Framesoft Data Insight (FDI) brings intelligence into unstructured data ownership and usage.

Accessibility and Ease of Use

FDI will access data stored in any of your Framesoft applications (and / or external applications) directly and is based on the provision of predefined business views to its users as the basis for any analysis and report.

Business users can analyze the data on demand with no infrastructure setup and no time-consuming transformations, pre-processing or metadata management.

There is no query language to be learned and applied, allowing you to work with your data intuitively and ad hoc.

Seamless Integration with Framesoft Solutions

FDI is offered as an add-on to any Framesoft solution licensed and there is no complex integration process required.

All you need to begin your data exploration is to define your business views, which will be pre-configured by Framesoft for direct access.

Users will configure their reports from the same user interface as the Framesoft solution they are used to. They are offered an intuitive and highly accessible and flexible toolset to analyze the data, configure and execute required reports and data visualizations / dashboards on the fly.

Framesoft Data Insight (FDI)

FDI also provides a report library, where users can store and publish their reports for re-use.

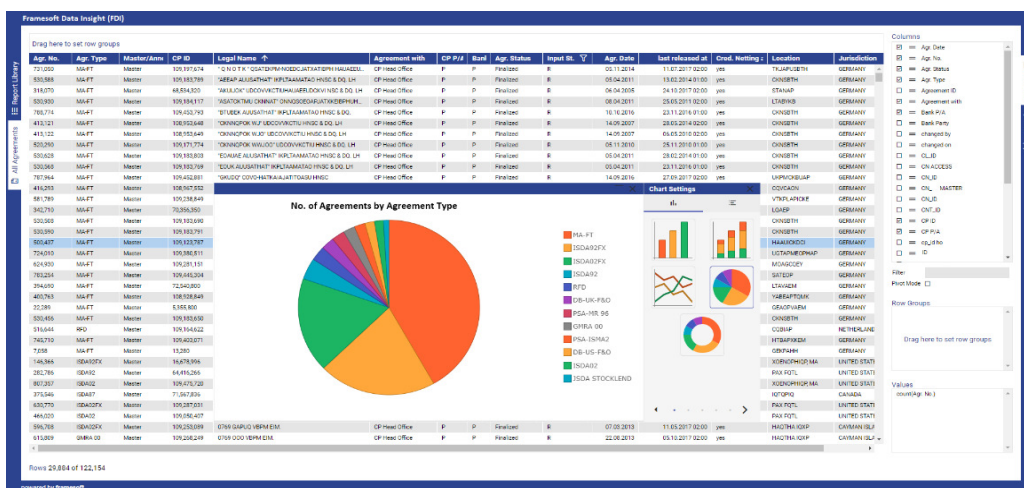

The integrated chart engine allows displaying and providing report results as graphical interpretation.

Data Extraction and Presentation

Data can easily be filtered, grouped, summed, averaged, etc. and displayed in a "Pivot" table according to user-defined row and column criteria.

By leveraging FDI, you put business users in command of their data management requirements. Furthermore, artificial intelligence and analytics via Framesoft Data Insight and Framesoft Document Intelligence can be combined to provide deep insights into a document or contract repository, assist in document or contract review and creation and / or determine

critical sets of documents for manual review. FDI has been designed to get the best from your data lake with the Framesoft tools and platforms you already use, adding value to your data and reaping the benefits of Framesoft's

unique Application Framework.

Key benefits of FDI

- FDI supports data analysis & ad-hoc reporting as well as standard reporting and Dashboarding
- Access to your accurate real-time data provided via predefined business views as the basis for any analysis
- FDI can be extended by additional business views at any time
- Easily create, distribute and re-use compelling reports and eye-catching dashboards
- Support of in-depth analysis
- Filtering, Grouping and Pivot Mode supported
- Drill down to individual data record
- Aggregations such as Average, Count, First, Last, Min, Max and Sum
- Data & Dashboard export

Framesoft's product & services portfolio is strongly focusing on the financial services industry and covers the complete life cycle of a software solution, ranging from supporting the early conceptual application design stages, to the delivery and integration of the application into the client's infrastructure.

Framesoft is also capable offering application support requested by a customer such as production support as well as business and user support. Additionally, Framesoft offers to run its applications as ASP service based on its advanced cloud infrastructure in Switzerland.

Framesoft was founded in 1996 with the goal to create technology solutions for innovative, fast-growing areas within the financial services industry. Framesoft solutions are built on a foundation of core modules (Frameworks) enabling rapid application development mainly based on configuration to meet the ever-evolving needs in these markets.

Framesoft's mission is to maximize the benefits of external technology provision for our clients, by applying the Framesoft Framework strategy.

Framesoft's unique selling proposition is the support of complete value chains including areas typically conducted by means of unstructured tools such as paper, e-Mail, facsimile or telephone.

Customers using Framesoft solutions

- achieve a high degree of **Straight through Processing (STP)**,
- avoid typical **operational risks** associated with manual interventions,
- gain **control** over complex business processes,
- increase Business **Process Efficiency & Transparency**,
- cut **Time-to-Market**,
- reduce **Legal & Credit Risk**

Framesoft's headquarter is located in Zug, Switzerland and Framesoft runs subsidiaries with offices in

- Europe
 - Switzerland (Zug),
 - Germany (Frankfurt and Munich),
 - United Kingdom (London),
- North America (Vancouver) and
- Asia (Fiji)
