

VERSION CONTROL

Framesoft Version Control (FVC)

Software Version Control is very important for tracking and managing any changes conducted and rolled out / introduced with a new software release, update, or patch. Furthermore, version control is consistently one of the highest predictors of performance in developing and delivering software.

Framesoft Version Control (FVC) is provided as an add-on to any Framesoft solution. FVC addresses the software release process automation & transparency and allows the deployment of

- upgrades,
- releases or
- configuration updates

into different environments in a fast and safe manner.

Furthermore, FVC will allow to gain transparency about any objects / components which have been updated either by the customer's internal development team or received via Framesoft version / upgrade or patch.

Framesoft Version Control (FVC) will manage the process of packaging and deploying or updating any Framesoft solution from development, across various System Integration Tests (SIT) and User Acceptance Tests (UAT) environments, and ultimately to production via "XML Ex- and Imports".

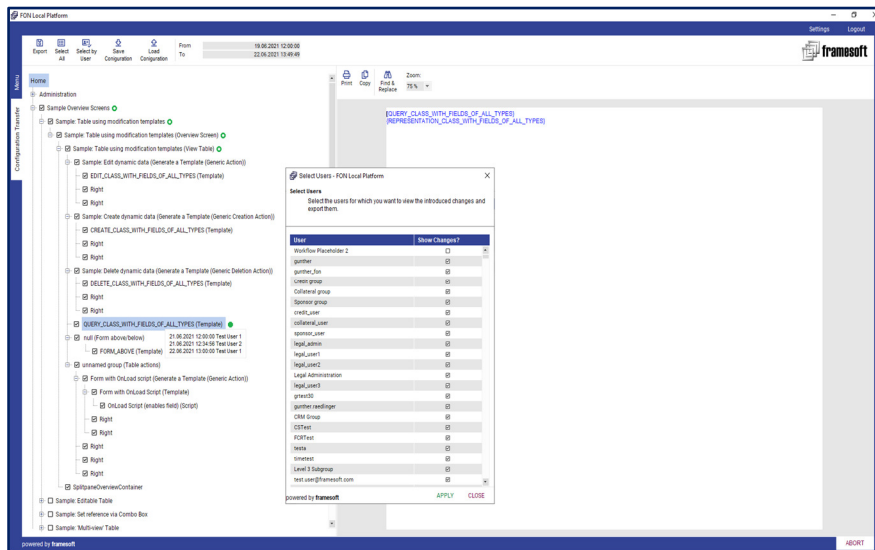

Framesoft Version Control (FVC) will tremendously

- speed up,
- automate,
- simplify,
- secure and
- make transparent

the software development, packaging, and release process by offering the following version control functionalities:

- Tagging of any updated / changes objects (e.g., overview configurations, scripts, templates, actions, etc.)
- Visualization of updated / changes objects grouped by components via tree structure for a freely defined period
- Updates / changes performed by selected user(s)
- Display of object change history

- Restoring of previous object versions
- Detail view of updated objects / components
- Automated XML export of all / selected updated components / objects
- Predefined configuration management (Save and Load predefined configurations)

Therefore, FVC addresses the governance, risk, and compliance (GRC) or regulatory needs in place in the financial services industry.

Additionally, Framesoft Version Control (FVC) can be integrated with any enterprise release management solution in place.

Beside Version Control Framesoft offers the following Add-Ons to its solution:

- **Framesoft Data Insight (FDI)**
Data Analysis & Reporting tool
- **FCR Agreement API**
Creation & updates of agreements / annexes in FCR triggered by external sources via FCR API
- **Framesoft Central Counterparty Interface (CCI)**
Exchanging information with the client's Central Counterparty system
- **Framesoft Document Assembly (FDA)**
Realtime creation & configuration of doc. templates
- **Framesoft Online Negotiation (FON)**
Agreement Generation & Negotiation
- **FON Bridge**
Bridge between FON and FON application running in a demilitarized zone (accessed by Counterparty)
- **Framesoft Multi-Factor Authentication**
Additional security layer by granting access upon successfully presenting two (or more) pieces of evidence (factors) to authentication mechanism.
- **Framesoft Document Intelligence (FAI)**
Bringing natural / legal language processing & modern artificial intelligence methods to documents

COMPANY PROFILE

Framesoft AG Software Applications

Framesoft offers the following fully integrated solution portfolio

- **Framesoft Contract Repository (FCR)**
- **Framesoft Document Management (FDM)**
- **Framesoft Structured Products (FSP)**
- **Framesoft Fee Management (FFM)**
- **Framesoft PRIIPS KID Generator (FPG)**
- **Framesoft OTC Platform (FOP)**
- **Framesoft Confirmation Generator (FCG)**
- **Framesoft Matter Management (FLM)**
- **Framesoft Repo & Securities Lending (FRS)**
- **Framesoft Document Generator (FDG)**
- **Framesoft Resource Management (FRM)**
- **Framesoft Secure Online Data Room (FDM Platform)**
- **Framesoft Online Negotiation (FON for MA)**
- **Framesoft Protocol Platform (FPP)**
- **Framesoft Data Insight (FDI)**
- **Framesoft Document Intelligence (FAI)**

Framesoft's product & services portfolio is strongly focusing on the financial services industry and covers the complete life cycle of a software solution, ranging from supporting the early conceptual application design stages, to the delivery and integration of our applications into the client's infrastructure.

Framesoft is also offering application support including

- 1st / 2nd / 3rd level production support
- business and
- user support.

Additionally, Framesoft offers to run its applications as ASP service based on its advanced cloud infrastructure in Switzerland.

Framesoft was founded in 1996 with the goal to create technology solutions for innovative, fast-growing areas within the financial services industry. Framesoft solutions are built on a foundation of core modules (Frameworks) enabling rapid application development mainly based on configuration to meet the ever-evolving needs in these markets.

Framesoft's mission is to maximize the benefits of external technology provision for our clients, by applying the Framesoft Framework strategy.

Framesoft's unique selling proposition is the support of complete value chains including areas typically conducted by means of unstructured tools such as paper, e-Mail, facsimile or telephone.

Customers using Framesoft solutions

- achieve a high degree of **Straight through Processing (STP)**,
- avoid typical **operational risks** associated with manual interventions,
- gain **control** over complex business processes,
- increase Business **Process Efficiency & Transparency**,
- cut **Time-to-Market**,
- reduce **Legal & Credit Risk**

Framesoft's headquarter is located in Zug, Switzerland and Framesoft runs subsidiaries with offices in

- Europe
 - Switzerland (Zug)
 - Germany (Frankfurt and Munich)
 - United Kingdom (London)
- North America (Vancouver) and
- Asia (Fiji)
