

DATA INSIGHT

Turn data into information and information into insight

Framesoft Data Insight (FDI) is the universal data platform analysis & reporting tool and lets you discover hidden insights across all internal / external platforms (Cloud) / data lakes. FDI transforms huge amounts of raw data into actionable reports & dashboards. Track your key business metrics, see short / long-term trends, identify outliers, and unearth hidden insights via FDI.

Analytics are changing the way enterprises do business. Every organisation is collecting and creating huge amounts of data. As companies have accumulated more and more data the need to analyze & extract additional value from data effectively has increased dramatically. Understanding that data, interrogating data to tell relevant & meaningful stories and making those insights available for everyone is how modern

businesses scale at pace. Framesoft Data Insight (FDI) is Framesoft's answer to this demand.

FDI lets our clients use their internal and external data in real-time to analyze their operations and make better

decisions and predictions. Framesoft Data Insight (FDI) brings intelligence into unstructured data ownership and usage.

Cloud Accessibility and Ease of Use

FDI connects to any internal or external (cloud based) applications directly, retrieves the data and can be used to support your decision process in real-time. Data retrieved from any source is automatically transformed into business views and made available in FDI. Business views (from all sources) can be connected in FDI via joins which support navigating through your data siloes / universe and extracting the deepest insight from your data.

Business users can analyze the data on demand with no infrastructure setup and no time-consuming transformations, pre-processing, or metadata management.

There is no query language to be learned and applied, allowing you to work with your data intuitively and ad hoc.

Seamless Integration

FDI is completely integrated in our solutions and can be connected to any internal or external cloud data source.

Users are offered an intuitive, highly accessible and flexible toolset to analyze the data, configure and execute required reports and data visualizations / dashboards on the fly.

Framesoft Data Insight (FDI)

FDI also provides a report library, where users can store and publish their reports for re-use. The integrated chart engine allows displaying and providing report results as graphical interpretation.

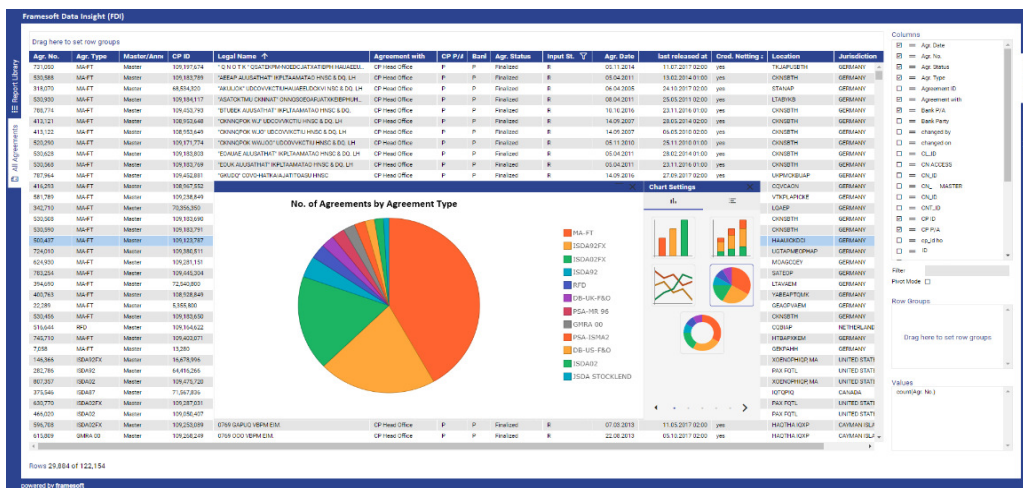

Data Extraction and Presentation

Data can easily be filtered, grouped, summed, averaged, etc. and displayed in a "Pivot" table according to user-defined row and column criteria.

By leveraging FDI, you put business users in command of their data management requirements. Furthermore, artificial intelligence and analytics via Framesoft Data Insight and Framesoft Document Intelligence can be combined to provide deep insights into a document or contract repository, assist in document or contract review and creation and / or determine

critical sets of documents for manual review.

FDI has been designed to get the best from your data lake with the Framesoft tools and platforms you already use, adding value to your data and reaping the benefits of

Framesoft's unique Application Framework.

FDI Key benefits

- Ad-hoc analysis of very large amounts of data using caching and compression technologies
- Intuitive access to complex data models
- All the power of Standard Query Language (SQL) in a graphical user interface
- Integration of various internal or external data sources in one reporting tool
- Support of data analysis & ad-hoc reporting as well as standard reporting and Dashboarding
- Access to accurate real-time data provided via business view
- Creation of additional business views at any time
- Linkage / Joining of Business Views & Drill down / drill up
- Easily create, distribute and re-use compelling reports and eye-catching dashboards
- Support of in-depth analysis

COMPANY PROFILE

Framesoft AG Software Applications

Framesoft offers the following fully integrated solution portfolio

- **Framesoft Structured Products (FSP)**
- **Framesoft PRIIPS KID Generator (FPG)**
- **Framesoft OTC Platform (FOP)**
- **Framesoft Contract Repository (FCR)**
- **Framesoft Confirmation Generator (FCG)**
- **Framesoft Legal & Compliance Matter Management (FLM)**
- **Framesoft Document Management (FDM)**
- **Framesoft Repo & Securities Lending (FRS)**
- **Framesoft Fee Management (FFM)**
- **Framesoft Document Generator (FDG)**
- **Framesoft Resource Management (FRM)**
- **Framesoft Secure Online Data Room (FDM Platform)**
- **Framesoft Online Negotiation (FON) for (Master) Agreements**
- **Framesoft Protocol Platform (FPP)**
- **Framesoft Data Insight (FDI)**
- **Framesoft Document Intelligence (FAI)**

Framesoft's product & services portfolio is strongly focusing on the financial services industry and covers the complete life cycle of a software solution, ranging from supporting the early conceptual application design stages, to the delivery and integration of the application into the client's infrastructure.

Framesoft is also capable offering application support requested by a customer such as production support as well as business and user support. Additionally, Framesoft offers to run its applications as ASP service based on its advanced cloud infrastructure in Switzerland.

Framesoft was founded in 1996 with the goal to create technology solutions for innovative, fast-growing areas within the financial services industry. Framesoft solutions are built on a foundation of core modules (Frameworks) enabling rapid application development mainly based on configuration to meet the ever-evolving needs in these markets.

Framesoft's mission is to maximize the benefits of external technology provision for our clients, by applying the Framesoft Framework strategy.

Framesoft's unique selling proposition is the support of complete value chains including areas typically conducted by means of unstructured tools such as paper, e-Mail, facsimile or telephone.

Customers using Framesoft solutions

- achieve a high degree of **Straight through Processing (STP)**,
- avoid typical **operational risks** associated with manual interventions,
- gain **control** over complex business processes,
- increase Business **Process Efficiency & Transparency**,
- cut **Time-to-Market**,
- reduce **Legal & Credit Risk**

Framesoft's headquarter is located in Zug, Switzerland and Framesoft runs subsidiaries with offices in

- Europe
 - Switzerland (Zug),
 - Germany (Frankfurt and Munich),
 - United Kingdom (London),
- North America (Vancouver) and
- Asia (Fiji)
